See www.icdl.com for more information.

Closing Remarks

Four Workshops Available

The Basic Course has given you a background in the DIR[®]/Floortime Model. To reinforce these principles, and to understand how to apply them in different situations, please consider taking these four workshops:

1. Workshop on the Learning Tree: Explains the DIR[®] Model and Floortime as applied to educational challenges.
2. Workshop on Regulatory and Sensory Processing Disorders: Provides more in-depth understanding of the child's individual differences and how to bring this into your DIR[®]/Floortime.
3. The Lifespan Approach to Autism Workshop: Provides Floortime examples of how to support the development of older children with ASD.
4. The Meltdown Workshop: Presents the basic Floortime principles for helping children with special needs control aggression.

*Thank You All Very Much
for Joining Us!*
